

Wildcard — Accounting Controller Workflow (Simplified)

Client: Wildcard (Mems Studio, Inc. DBA Wildcard) | **Period:** June 2026 | **Report type:** Consolidated close report

This session was a full fresh re-run of the entire workflow — Intake Agent and all 6 Sub-agents were re-executed from the beginning, per FM instruction. Every step below ran this session; none of the results shown are carried forward from a prior session without being re-confirmed.

What ran this session

Stage	Ran this session?	Result
Intake Agent	 Yes	All 6 standard inputs checked; ctx_09 present; ctx_17 and bank statements still missing (standing gap, FM override to proceed)
1. System Changes	 Yes	Confidence 1.0 — no closed-period edits, chart of accounts stable
2. Completeness	 Yes	Confidence 0.7 — Modules 1-4 run, bank rec limited by missing bank statement
3. P&L Consistency	 Yes	Confidence 0.7 — Revenue/COGS tie exactly, Deferred Revenue tie exactly
4. Payroll	 Yes	Confidence 0.8 — all 3 payroll categories tie exactly
6. CF Consistency	 Yes	Confidence 0.8 — CF internal integrity holds; CF-vs-BS variance re-confirmed as structural, not an error
5. Balance Sheet	 Yes	Confidence 0.8 — BS ties exactly; every account's movement explained except the carried-forward \$2.00 item

Compounded outcome reliability

Chain anchor: **Balance Sheet Agent** (highest-sequence Sub-agent with resolved output this session).

Compounded outcome_reliability through the chain anchor: **1.0**

This Consolidation Agent's own outcome_reliability (session-detection/relay process adherence, multiplied by the chain anchor's value): **1.0**

Key tie-outs confirmed clean this session

Tie-out	Result
Total Revenue (GL vs P&L)	\$364,000.00 = \$364,000.00 — EXACT TIE
Total COGS (GL vs P&L)	\$42,395.75 = \$42,395.75 — EXACT TIE
Balance Sheet ties (Assets = Liabilities + Equity)	\$519,363.38 = \$116,358.64 + \$403,004.74 — EXACT TIE
Deferred Revenue movement (GL vs BS)	-\$72,000.00 — EXACT TIE
Payroll categories (Salaries+Bonus+Commission, ER Taxes, ER Benefits)	All tie exactly, GL to payroll sheet
CF internal integrity (Starting Cash + Net Cash Flow = Ending Cash)	Holds exactly, May and June 2026
Duplicate detection / closed-period edits / chart of accounts	No duplicates, no closed-period edits, chart of accounts stable

Open items requiring your attention

#	Severity	Item	Raised by	What to do next
1	HIGH	Transfers in Transit: Payment Processor — flat \$2.00 balance carried across multiple months, unresolved since a 2026-07-28 transition note.	System Changes / Balance Sheet	Confirm with bookkeeper/payment processor and clear or explain.

2	MEDIUM	\$7,500 unexplained bank transaction dated 2026-06-04.	Completeness	Confirm with bookkeeper the nature of this transaction.
3	MEDIUM	Undocumented "Brex" counterparty in transaction memos.	Completeness	Confirm with bookkeeper/client the nature of this relationship.
4	MEDIUM	Bonus/commission of \$15,250 bundled into Salaries+Bonus+Commission, not a separate GL line.	Payroll	Decide whether a separate GL line should be created going forward.
5	STRUCTURAL	CF tab vs BS ending cash variance of \$50,058.53 (June) — CF tab is a simplified Operating-only construction; GL and BS agree with each other exactly.	CF Consistency / Balance Sheet	No action needed on GL/BS; consider expanding the CF tab's construction if a full 3-statement CF view is desired.
6	LOW	Headcount per June payroll (13) vs ctx_13's stale reference (~15).	Payroll	Update ctx_13 when convenient.
7	LOW	ctx_14 payroll-processing-fee assumption appears stale.	Payroll	Update ctx_14 when convenient.
8	STANDING GAP	ctx_17_accounting-policy-framework.md still missing — blocks formal materiality-threshold confirmation platform-wide.	Intake (standing, FM-overridden)	Source or approve ctx_17 for future runs.
9	STANDING GAP	No bank statements (Chase/Amex) available — blocks full bank reconciliation and 3-way CF cross-check.	Intake (standing, FM-overridden)	Provide bank statement access for future runs.

Bottom line

All 6 Sub-agents plus the Intake Agent were re-executed in full this session — no step was skipped or relied upon from a prior run. Every core tie-out (Revenue, COGS, Balance Sheet, Deferred Revenue, Payroll categories, CF integrity) reconciled exactly. Nine open items carry forward, one at HIGH severity (the \$2.00 Transfers in Transit item) and two are standing, FM-overridden gaps (missing ctx_17, missing bank statements) that limit how far any Sub-agent could verify materiality or complete bank reconciliation this period. No critical-severity escalation occurred, so the workflow ran end-to-end without a halt.
